

ROOM THERMOSTAT

Product Code: STTRSL-C

FEATURES:

- Diaphragm sensing element ensures close temperature control for all loads and applications.
- Attractive modern styling makes this frost thermostat ideal for locating in the living space.
- The STTRSL-C has volt free changeover contacts for use in cooling or heating applications.
- Heating On Indicator Lamp (only when connected to 230V AC)
- Mounts directly onto wall or conduit box.
- Improved easy-to-wire terminals.
- Double insulated (No earth required for operation).
- Raised Dial for ease of use.
- Suitable for use with combination boilers.
- Suitable for all control voltages up to 250V AC.
- ErP Class 1

The Corgi STTRSL-C is a dial-type mechanical room thermostat for regulation of room temperature, and includes a useful neon indicator to show when the heating is ON. With neutral housing to blend in to any style of decor.

Designed for wall mounting, with 60mm fixing centres for back-box compatibility, and suitable for in-wall or surface-run wiring connection. The thermostat cover incorporates four breakouts for surface-run conduit. The temperature regulation mechanism is the well-proven sealed bellows system.

SPECIFICATION:

Temperature control range:

Switch Contacts

Switch type:

Rating:

Switching differential:

Ambient temperature:

maximum Insulation:

Applications:

Connection type:

Combination boiler compatible:

10°C to 30°C

SPDT, voltage free

SPDT (Heating/Cooling) Switch

10A (resistive) @ 230V AC

1°C

+40°C

Class II

Heating or cooling systems

2 wire (switched pair)

Yes
